

Submitter: Heather Gray
On Behalf Of: Everyone
Committee: Senate Committee On Energy and Environment
Measure, Appointment or Topic: SB827

I strongly oppose SB 827. I want taxes focused on what's necessary and constitutional, like roads and fires, and get rid of what government never should have covered, like solar panels. Do not everyone's money to give incentives on this environmentally damaging technology -- do you know what happens to broken and used-up solar panels? This does not benefit the poor, who need their burden reduced and justice. Thank you. YHWH Elohim including Christ Jesus love you.
