On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB551

I support this bill to prohibit the continued use of plastic bags by retailers and restaurants. As plastics and microplastics are increasingly being linked with pollution in our ecosystems and personal physical systems, it is way past time we take affirmative action to reduce the proliferation of plastic in our state. This is an easy place to start, again. Please support this bill and keep a bit of plastic out of our waterways, lands and bodies. Thanks.
