Testimony in Support of UI for Striking Workers

To the Senate Committee on Labor and Business:

Being on strike for more than 7 days is a huge hardship for so many people. Being out of a paycheck or even part of a paycheck can be a huge financial burden. I have heard of many people who come from single income families, and are supporting multiple people. Strikes should not put someone into debt or add to their debt.

Thank you for accepting my testimony and I look forward to your support.
