

Submitter: Cole Hanson
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3155

I believe we should be able to drive our SXS vehicles on the road in Oregon just like we are able to do in Nevada, Arizona, and Utah. Living out in the woods, being able to drive the SXS on the paved roads creates the opportunity to run quick errands to mail box or other such things and also allows us to ride trails that would otherwise have to trailer SXS to get to normally. If the concern for why we shouldn't be able to drive on pavement is because of people doing the wrong thing and doing stupid stuff that they wouldn't normally do in POV, the punishment for such things should be suspension of registration of SXS or off road vehicles and a remediation course for serious infractions. Just because there are a few bad apples that does not justify why we shouldn't be allowed to drive on the pavement with proper enforcement. Please consider approving this legislation so we can enjoy what other people in different states have.
