RE: Support for SB 916

To the Senate Committee On Labor and Business,

Providence would never have failed to bargain in good faith with their workers had they understood they would not only pay nurses unemployment as well as cover their illegal strike breakers.

In a system where employers can hold out infinitely due to the wealth amassed from their workers there must be a financial incentive added to balance the power dynamic.

Thank you for accepting my testimony and I look forward to your support.
Nathan Weiler RN
