

Submitter: Linden Jeffers

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB551

Single use plastic bags are a scourge on the environment. Reusable plastic bags are often worse because they are treated as disposable by a vast number of people.

Plastics have devastating impacts on our environment, including oceans, lakes, rivers, and other waterways. Many people don't have a clue how to properly recycle plastics, and some of these efforts are not even viable. And too many people simply don't care about the environment. Please vote yes on SB 551. Thank You
