

Submitter: Michelle DeLaria

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or
Topic: SB769

Sport hunting mountain lions has been scientifically shown in multiple studies to increase attacks on people, pets and livestock because the age skews to younger animals who are less skilled at killing appropriate prey and who are on the move to claim territory.

Only mountain lions proven to be causing a problem should be managed. Please don't allow sport hunters to create more problem mountain lions and put others at risk.
