

Submitter: Evelyn Liska
On Behalf Of:
Committee: Senate Committee On Natural Resources and
Wildfire
Measure, Appointment or
Topic: SB769

This is very important for the people with livestock. Also for the lack of the deer population. I live on Wolf Creek where it is mountains we used to always see deer going an coming but not any more especially last 5 -10 yrs.

I personally have lost 8 - 10 goats 3 Llamas. I have donkeys that help protect my goats for last 6 yrs. And barking dogs.i also have property on Battle Creek rd I don't have goats sheep, just 3 big donkey's. They take good care of themselves. They kick up there heels at any thing that doesn't belong there. But so many sheep and goats have been killed all around there. And many have been seen on the property. The cougars Are way over populated and out of balance. Prior to the 80's we never heard of cougars. The dog runners kept them away from population. Also bear are over populated. They get more than there share of baby deer. I so hope we can get things back in balance. Thank you for trying to help the farm animal . Evelyn Liska
