

Submitter: James Toops
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB2332

I James Toops support HB 2332, as a former Clackamas Soil and Water Associate board member I have seen this device operate in the field firsthand with little to no smoke. It has many benefits that help improve air and water quality. To replace the missing nutrients in our soils and rebuild the life cycle in our soils. Better pastures better farming.

Thank you,

James T
