Committee: House Committee On Behavioral Health and Health
Care

Measure, Appointment or
Topic: HB3439

For many Oregonians, Naturpathic healthcare is not a secondary or supplemental form of health care; rather it is the primary healthcare method. For many more Oregonians, Naturopathic healcare is a supplemental health care method, supporting their primary treatment of disease from their MD. Either way, it is both a legitimate and effective form of healthcare and treatment, and it is imperative that our NDs receive full support and reimbursement for any and all services which they can provide Oregonians towards treatment, healing, and maintaining optimal health.
