

Submitter: Anthony Pokorny
On Behalf Of: Constitutionalist minded folks
Committee: Senate Committee On Labor and Business
Measure, Appointment or Topic: SB916

Salutations Senate Committee;

I strongly oppose this bill as this bill only favors Unions to strike on my dime. I don't pay for others to choose NOT to work for their own benefit. Unemployment is meant and design for those who lose their jobs at no fault of their own. This a bluntly a dishonest attempt to disadvantage those who pay into the system and end up screwing over those who are not in a union, either by choice or not and force those not in unions into paying into unions. Further, any union on strike can just stay on strike indefinitely doing no work, no contract work being done, and only benefitting unions twice over. Healthcare workers, for example, go on strike and anyone needing care are put in harms way for no reason but union workers personal greed, union greed, and corporate greed while someone who works non-union are put at disadvantage healthcare wise, and put lives in danger for no reason for months on end, making Oregon healthcare system even worse than what it already is. Same with teachers unions, in which, any parent would be wise to take their kids out of public schools and put them in private schooling, making things more difficult for those parents while devaluing public education, which is already the worst in the nation and a complete joke compared to the rest of the nation. Perhaps this will push to end public schooling? A wise parent would only hope so.

Regards

Anthony "Tony" Pokorny
