RE: Support for SB 916

To the Senate Committee On Labor and Business,

Corporate greed has put workers in a dire financial position. Having a union and the right to strike is great; but when workers can't afford to even miss one paycheck to do so, do they really even have the right at all? So many of my fellow nurses had no choice but to cross our picket line on Day 1 of the strike because their families would suffer without a paycheck. Unemployment benefits for striking workers is a must if we are ever going to truly fight corporate greed.

Thank you for accepting my testimony and I look forward to your support.
