RE: Support for SB 916

To the Senate Committee On Labor and Business,

I as a healthcare worker am now out of over a month's income as the primary earner in my home. This means I am scrambling to cut any corner, sacrifice any non-necessity and using my hard earned savings as a lifeline to keep my family fed and homed. I and my family have committed to this because we see the imbalanced and broken healthcare system and are willing to do our part to right it when we can. This is scary. I have never needed to shop at a food pantry before, or apply for utilities relief. We work hard and live within our means, but this is unprecedented and necessary. If we were offered unemployment insurance during this time, it would offer so much stress relief and really give us the ability to stand with confidence against a multi-billion dollar corporation who is keeping money from our community services and servers and giving it instead to the executives and shareholders. I also know many who have had to cross the picket line because they simply could not out-spend this giant...which they know and use as a manipulator to continue their selfish pursuits.

Please help us right these wrongs by passing Senate Bill 916 / House Bill 3434.
Chelsea Inman RN, MSN
