RE: Support for SB 916

To the Senate Committee On Labor and Business,

Healthcare workers strike for extreme reasons such as unfit pay/benefits and dangerous work environments. Workers subjected to such situations deserve financial support in the quest to better our healthcare systems. Strike actions are for WORKERS, who work - not the habitually unemployed. Strikers must still show up. Strikers make huge sacrifices to make the future better for everyone. Unemployment insurance would reduce the significant sacrifice that these hard workers must endure. Let's support those that take care of us. Let's be better.

Thank you for accepting my testimony and I look forward to your support,

Kristen Natharius NP
