

Submitter: Jacob Anderson

On Behalf Of:

Committee: Joint Committee On Ways and Means Subcommittee On Human Services

Measure, Appointment or Topic: HB5025

I object to being a part of annual costs and measures, in which I'm seeking investigative independent exams, due to lengthy misdiagnosis of multiple as to one account with all but 2 items.

They are choosing to use 6 options which have acute rather than 1 of PTSD with variant standards.

I have no problem stating your money is being missed and treatment is unnecessary because I self tested through talk space.com, in which is said 52/80 in debilitation when under extreme stress, in which the Polk County Community Corrections Agency is inducing on purpose even if in violation of laws and ordinances. Talk space provides a preliminary self test and option to see where your mind is with your issues in a safe, home based location where no obligation to disclose personal information is needed.

I find it disgraceful and abhorrent to medical diagnostics and treatment that the probation department can recommend specific criteria or federally recognized medications such as cannabis to be disallowed due to prior use without permission leading to their "criminality" relating to cannabis.

Specifically, James Kevin Ryzdewski AKA, Jim Ryzdewski,
