

Submitter: Kyle Moore

On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and Water

Measure, Appointment or Topic: HB3419

To the House Committee,  
I oppose this bill.

My well should not be metered! The water resources department should NEVER have the ability to force me to put a meter on my wells. I have a livestock well that is exempt from all water rights (I have checked) and I do not want the extra burden of having to put a meter on it. I have farmer friends that have seen how poorly mismanaged the Water Resources Department is at getting through water rights transactions and other things related to water. I cannot for the life of me understand why they are wanting even more work when they cannot even approve/deny a water right or or almost any decision for that matter. Why don't we fix those issues first before adding a MASSIVE extra amount of work that they cannot even handle already. Also, if this goes through, who will pay for these meters??? Who will pay for the massive influx of data coming in to them??

Thank you for your time, and please consider ousting this bill entirely, as it is bad for this state!

Kyle Moore.
