Measure, Appointment or Topic: HB3062

As an Oregonian that has slowly watched our beautiful land and healthy environment deteriorate over the last 20 years or more I support this bill. Whether you've lived here your whole life or only a few years I'm sure the reason that you're still here is because of the beauty of this land and the cleanliness of the air and water and this bill would help remain in a similar condition. As I drive the streets of Portland and Washington County I see an extreme amount of industrial building going on. Over the past few years I have worked a few different Manufacturing companies and I have seen the amount of resources they use and the amount of unclean unfiltered pollutants they put back in the environment which is heartbreaking. I know that tax dollars are important to keep the structure afloat but can we please keep some land and it's natural state? These industrial buildings and what they produce or do inside has a huge effect on the water supply as well as the amount of energy they require to run and we all know that incorporations pay at a much reduced rate then a single person like myself which is completely unfair. I support this bill and I hope you will too thank you for your time.
