

Submitter: Samira Rodriguez Lopez

On Behalf Of:

Committee: House Committee On Emergency Management, General Government, and Veterans

Measure, Appointment or Topic: HB3062

My name is Samira Rodriguez Lopez, I am part of the environmental Justice class at Parkrose High school. I live in the parkrose community, and slowly i've seen the air quality here get worse and worse. I support the HB3062 movement because people like me who suffer from asthma, and senior citizens who have breathing problems live in this community where they built a prologis just a few feet from our school and houses. I am one of many people who walk to school because I don't live to far, I also like to take my dog out for walks at the park. With the prologis that was built I did notice a big difference in the quality of the air, I noticed how much harder it was for me to breathe, I would find myself out of breath faster, and use of my inhaler more. I don't want other kids from different schools and other citizens who also struggle with asthma to go through what we're going through with bad air quality. That's why I am asking you today to please take into consideration to help out other communities so future generations and even older generations can breathe in clean air into their lungs. I thank you for listening to my speech today!
