

Submitter: John Tuong

On Behalf Of:

Committee: House Committee On Emergency Management, General Government, and Veterans

Measure, Appointment or Topic: HB3062

Thank you for taking time out of your day to read my testimony. My name is John Tuong and I am a student at Parkrose High School. Currently I am enrolled into an English activism class where we have been learning about the things being done to our community and what we can do as activists in order to combat these wrongdoings. I am also a part of the Parkrose community and this is why I care so deeply about these issues.

Today I would like to talk about my proposal to take down bill HB3119. As this bill has a direct negative influence on the amount of Advanced Clean Trucks that are being implemented into the state of Oregon. In my opinion this bill has a significant effect on the Parkrose community. As the Parkrose community already faces a multitude of issues stemming from the poor air quality that is an ever growing issue. And with the implementation of bill HB3119 I think that this issue will continue to affect generations to come.

There have been many proven correlations between the fossil fuel being burnt by trucks and many devastating side effects that are harming our planet. I think it is so important to raise awareness on these issues as our kids and generations after that will be living where we are today. And earth has already been through so much environmental devastation to the point where in a couple generations from now the earth will not look the same. Although it is nearly impossible to undo what we have done, we can take it one step at a time and oppose bills such as bill HB3119 that are continuing to harm this planet. Again thank you for taking the time to read my proposal today.

Sincerely,

John T.
