

Submitter: Harmony Wortham

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB3435

To Whom It May Concern,

I support HB 3435, as a lifelong resident of the portland metro area, I believe all students should have a right to free meals at school. This is the exactly where I want my tax money going and is something the vast majority of people can agree is a good use of funding. I grew up on free lunches in Elementary school, which helped my family immensely. Even those who do not qualify based on income deserve the relief that free meals at school would bring. With the prices of everything being very high, it is the responsibility of the state to ensure our kids remain fed!

Thank you for your consideration and support of this bill!
