

Submitter: Robert Goldman

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2038

We need to focus on solar, wind, and storage technologies, as these are the clearest, safest approaches toward sustainability. Carbon capture, as it evolves, is also worth considering. Nuclear reactors, managing waste, safe/clean uranium extraction and transport, securing waste, hardening defenses such that reactors are not vulnerable to terrorist attacks...once these problems are solved, we might consider a study on nuclear energy.
