

Submitter: Luke Wisher

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

I support HB 3546 because my own energy costs have risen significantly, and it's unfair that my tax dollars could go toward subsidizing the energy needs of data centers and cryptocurrency operations. These large energy users are driving up demand and making our power grid more expensive to maintain, yet households and small businesses are left paying the price. This bill ensures that these corporations pay their fair share instead of shifting the burden onto everyday Oregonians.
