

Submitter: Jane Civiletti

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB216

Repealing a ballot measure that has been protecting the state, and frankly the world, since 1990 is harsh. Removing protections from the addition of more nuclear waste to our state is ludicrous. Producing highly reactive nuclear waste in hopes of slowing now obvious climate change is not solving our ultimate hope of a livable planet.
