On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

I strongly oppose HB 3362, the tire tax bill. Oregon does not need any more taxes taken from citizens, especially for those who require transportation to get basic needs met like getting to work, medical appointments, or getting groceries. This will hurt those who can least afford it the most! Unfortunately, this is just another climate change tax that the democrats are pushing as a "transport" bill making it seem like it'll help with roads or public transport, but it's doesn't help them at all. Seems like this is another bait and switch bill to push more of the leftist agenda. This is just another unnecessary bill to tax Oregonians into oblivion and force citizens to no longer be able to drive their own cars. If this was that important to the democrats, the funding for this could easily be found by cutting other unnecessary programs and reducing waste.

Also, THIS IS A SALES TAX. WE OREGONIANS DO NOT WANT ANY SALES TAXES IN OUR STATE!
