Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

I support corporations and businesses paying for the utilities, land, and natural resources they use, and paying for the environmental impact their businesses have on our resources. Residents should not shoulder the costs created by major corporations while the company receives tax rebates and tax breaks. Just as residents pay their share of utility costs, fees, and taxes for resources used, so should businesses. Stop giving our natural resources to large companies for free, or for less than market value.
