

Submitter: Alexander Ford

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

Chair Lively and members of the House Committee on Climate, Energy and Environment:

Massive technology companies are squeezing Oregon residents with unsustainable energy costs while they realize record breaking profits. The massive CO2 emissions of these data centers will also cause significant harm to our environment and speed global warming. As a concerned resident and tax payer, I urge this house committee to support House Bill 3546.

Respectfully,
Alexander Ford
