

Submitter: Erica Maggi

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

Please hold large energy users accountable to paying their fair share by voting YES on HB 3546.

The POWER Act protects Oregon families and small businesses from paying for data center-specific costs. This bill helps define parameters, so the large, often tax-exempt companies that are driving up energy costs can also share in the burden of paying for it.
