Joint Committee On Transportation

Measure, Appointment or Topic:

HB3362

Oregon doesn't have an income problem, it has a spending problem. You can't spend your way out of a bad budget anymore than you can walk your way out of a bad diet. We've reached a point that the average Oregonian has no way to calculate just how much they are paying in State taxes because everything is spread around like this tax would do. If you're going to tax us more be transparent about it. Quit punishing the people for poor funding management. Say no to HB 3362.
