

Submitter: Marvin J Cosby

Committee: Senate Committee On Education

Measure, Appointment or Topic: SB1098

Continuing to flood our schools with content other than the basics for becoming a productive member of society is tearing away the fiber of our county and continuing to send our children into a life of dependency. Oregon consistently falls to the bottom of our nation in education standards. You count the years, and never do we improve. Bottom five or ten way to go Oregon! We should be looking to better our proficiencies in the basics not flood minds with paraphilia.

Below is an example of what some would have in the schools and already in some. How can this improve reading, writing or arithmetic or help a state or nation succeed? Where in this bill does it address this issue and how to prevent it? I object to this bill and what it seems to allow or promote.

I am in opposition to the bill and ask that you would too.

Thank You

Marvin J Cosby

It's called Welcome To Sex by Melissa Kang and Yumi Stynes and it's a bright blue cover. For any parents looking to avoid this because this book in the the School System!!!!

I can't even, how is this even OK!

I share this for awareness, I didn't know. I believe it's should be a family choice when and what to share around sex for their children.
