On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

As a person who works in tech, and who deeply understands the massive impact that infrastructural costs have on our populace, I wholeheartedly support this bill. It is critical that commercial entities wishing to operate in Oregon pay their fair share to ensure that our power distribution system remains resilient. Reliable, low-cost power must remain available to the people of Oregon – and we must put our populace first, over commercial economic development.
