

Submitter: Helena Birecki

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

Dear Chair Lively and Members of the Committee,

Please support HB3546 to protect energy affordability for the average Oregonian, and put some safeguards and certainty around the power demand of large electricity users like data centers. I generally agree with the points made by Climate Reality Project Portland Chapter, energy modeler Pat Delaquil, Oregon CUB, and Southern Oregon Climate Action Now, and encourage you to re-read their comments in full.

Thank you,
Helena
