

Submitter: Brent Ancil
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3362

There will always be citizens who won't support public school funding because they don't have kids in school, and others who will oppose a tax on tires because they don't use public transportation. Many people depend on public transportation and a modest tax on tires to help pay for it is reasonable. Please don't let a vocal group of anti-tax activists stop you from doing your job to provide and pay for important public services.
