

Submitter: Rod Schilling

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: SB821

This measure is an attempt to decriminalize perverse, societal harming behaviors and reverse the public protections put in place by previous legislation. Purveyors of this criminal classification arguably cause more harm to society than any others. With one of the highest rates of recidivism, and the propensity to escalate to more heinous offenses, these perpetrators should be kept out of normal society. Rather than moving towards softening consequences, governing bodies should be endeavoring to make society safer by doing everything they can to incarcerate, segregate, and classify these criminals.
