

Submitter: Shelly Rogers

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure, Appointment or Topic: SB821

This is a disgusting option. This state needs to stop protecting criminals. Especially the most heinous known to mankind. I personally have 3 grandchildren whom were sexually abused by the same monster. He has been found guilty by the Department of Human Resources and Child Protection. The children's forensic investigators believe him to be guilty. Not one officer involved believes in his innocence. However, this state puts the burden of proof on the victim, even if the victim is a child of 3 and under. The abuser I speak of went so far as to admit his crimes via text. Still no action is taken. So trust and believe Governor Kotek, we have plenty of unqualified and non registered sex offenders that are not included in your 33,000 or 18 000 numbers. The solution is NOT to go soft on these offenders by lessening the level of offense or saving them from registration. If you are drowning in these numbers and cannot get them logged in? Do better! Hire more people, whatever it takes. But going soft on people who offend sexually is not an answer. The level in which women and children have been sexually assaulted in the state is absolutely atrocious! This is absolute nonsense. Please for the love of God, do not let this Governor further the destruction of this once great State. Do not pass this bill.
