Sales tax! plain and simple. Legislators are constantly nickel and diming the citizens of Oregon for WHAT? So they can balance their budget hand out money for mass transit that does nothing for people outside city limits. Even the residents avoid riding mass transit . As far as tire disposal there is a fee to aid in that like paint and batteries. Gas taxes are suppose to go for roads, bridges , licenses fees for cars, drivers , and just about any paperwork that needs to be done there is a fee for having it done. Do you have any idea how many people resist buying tires til they absolutely are forced to? 4% doesnt sound like much but add that to the price of the tires and it is shocking. Lets start thinking about the money already coming in and going out on programs of miscellaneous expenditures and is there any follow up and or accountability for that said money? Or does it get lost somewhere in the air.
