No Tax on Tires- This will hurt those who can't afford to pay more, and who do not get bulk discounts. Big business is allowed to write this off as a cost of doing business, but the average driver does not get these discounts. nor do they get to write this off. We should not have to pay for damage that others do. Instead increase the penalties for littering with tires and direct the public to recycle them properly at collection stations or at tire shops for a small fee like the one charged by Les Schwab and Discount Tire. Additionally, why not assess fees on fleet businesses that creat the most wear and tear on our roads and assess them for tires, not just at the truck scales.
