

Submitter: Susan Lee

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

Oregon is an attractive place for data centers to build because we have good natural resources for energy production and good public resources, our strong existing energy grid, internet infrastructure, roads, and other infrastructure. We should not give away these valuable and in-demand resources too cheaply to those who are trying to earn a profit. We must have data centers pay their fair share for the additional strain on the electrical grid and not ask regular citizens across the state to subsidize corporations.
