

Submitter: Carrie Cooke

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

I'm writing in strong support of HB 3546

It's inequitable that consumers are paying four times the amount for power than large users when the cost of power has been sharply increasing due to new demands by them. The state should correct rules to ensure consumers do not bare the brunt for a business to profit. It is either profitable on its own or it is not. The state shouldn't subsidize their profits with lower rates for them.

It's unacceptable. Oregon citizens shouldn't cover the costs for these businesses power and infrastructure costs. Please make these changes now.

Thanks for your time.

Carrie Cooke
