

Submitter: Sherry Bullard  
On Behalf Of: HB 3546  
Committee: House Committee On Climate, Energy, and Environment  
Measure, Appointment or Topic: HB3546

I am in favor of passing the HB 3546 to require large Data Centers and other large users of energy to pay their fair share for electricity and other public utilities. I'm a senior, living on my small savings and social security. I've taken advantage of every program to lower my usage and to use power effectively and yet every year my bills continue to rise while companies like Google, Amazon and others pay on average 6 cents less per kilowatt than I. This bill while not "fixing" the issue certainly is a step in the right direction. Please don't be swayed by arguments saying that if we do this big business will avoid building here. Nonsense, they are already here, they already received substantial tax breaks and other inducements to open in our state. If other states stood up and had the same or similar requirements then they would have to agree.

These companies are making BILLIONS or TRILLIONS of dollars and we, the folks of Oregon shouldn't have to fund them further.

Thank you,  
Sherry Bullard
