

Submitter: Shishir Agrawal

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

This legislation is designed to ensure that large energy consumers, such as the data centers driving up our energy costs, contribute their fair share toward maintaining affordable rates for all residents. With energy costs ballooning, it is essential that those who use significant amounts of power help offset the burden on everyday consumers. I believe that by supporting HR 3546, we can move toward a more equitable energy policy that benefits our entire community.
