

Submitter: Trevor McAllister  
On Behalf Of:  
Committee: House Committee On Education  
Measure, Appointment or Topic: HB3444

To whom it may concern:

My twin girls are currently enrolled at Springwater Environmental Sciences School. We absolutely love the school and its faculty. To see how much dedication, hard work, and love to put into making magic happen day to day is amazing. Knowing how much work they do in funding the remainder of the funds to keep the school alive is the concerning part. I'm my family supports the school financially as much as we can, however, there are more expenses outside of that which hinders our contributions. I fully support this bond and what it can do for the school. Easing the fundraising for the faculty so they can focus more on making the school even better would be a blessing. Improving the campus would be a dream. And lastly having my kids get to experience an amazing school get even more amazing would be the absolute best.

Thank you for your consideration.
