

Submitter: Brett Baylor

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB3546

I write to you in strong support of HB 3546.

As data centers and cryptocurrency mining operations consume ever-increasing units of energy from our grid, it makes a great deal of sense to charge them in a category different from normal residential and business users. The Oregon PUC is well suited to managing fair charges and monitoring the special and variegated uses of these data assets.

The current situation, where regular households help pay for data centers, is unfair to all Oregonians.

Please support HB 3546.
