

Submitter: D Torres
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3477

Chair & Committee Members,

I strongly oppose this bill. Current climate goals are very unattainable and making them more stringent makes absolutely 0 sense. Even IF Oregon and the entire United States went to zero emissions, it would not have an impact on the world temps by the year 2100. China, Russia and India will not be on board with this carbon money making hoax and they are the biggest polluters.

Oregonians are having difficulty making ends meet the way it is and it's bills like this that makes our energy even more costly and our grids unstable. Oregon should not be posturing itself after the failures of California.

I urge the committee not to let this bill through. Please OPPOSE this bill.
