

Submitter: Megan Newell
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3453

I offer my testimony in support of HB 3453. This would be a much needed simplification of travel and commuting between Portland metro, Salem, and Eugene, creating a better connection between our largest population areas and our state capital.

We need to decrease congestion along the I-5 corridor – what better way to do that than provide this commuting service. This will also help our state reduce greenhouse gas emissions. At this time in our climate crisis, this bill is imperative.
