

Submitter: Morgan Sorensen

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB3444

To whom it may concern,

I am a fourth grade teacher at Gresham Arthur Academy. I support HB 3444 because this directly impacts me and my students. My students deserve fair funding. 80% per student is not fair or equitable compared to the funding of traditional public schools. I have had multiple students this year that have changed from a traditional public school that were told they were 'unteachable' and after moving to my charter school they have thrived. I am able to give them one on one help and truly have seen how much they have grown. Knowing that our students are receiving less funding is disheartening and unacceptable to me as a teacher.
