

Submitter: Avi Goldshmidt

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3477

I support HB 3477. This bill is a necessary step toward meaningful climate change mitigation. This bill not only has implications for climate action locally but globally as well, since our forests in Oregon, particularly the coast range, hold more carbon per acre than nearly any other forest in the world. It is time to hold industries and government accountable for the wreckage they are saddling current and future generations with. Please vote yes on HB 3477.
