Committee: House Committee On Economic Development, Small
Business, and Trade

Measure, Appointment or Topic: HB2527

I spent a full youth of summers at the Union county fair and I can safely say it's long past due for these needed upgrades. The water/sewer/restroom additions at the fairgrounds will provide a structural component improving the fair going experience for the families involved in all aspects of the property including FFA and 4-H. As tourism in Eastern Oregon continues to grow this type of infrastructure can help attract a larger base of visitors and programs that will add dollars to the local economy. Please consider this project for all the positives it will bring to the Union County Fairgrounds.
