Measure, Appointment or Topic: SB681

I'm a PERS member. I don't want our money going into any more private equity investments that support fossil fuel development in any way. SB681 will put a PAUSE on new private equity investments. The percentage of investment in private equity is already too high! Don't put anymore into this type of investment.

Climate change is out of control. We have to limit our burning of fossil fuels and transition to clean energy sources. Our grandchildren deserve a planet that's livable. At the rate we're going, it may not be livable in 50 years. We have to do everything we can to mitigate climate change.
