I have lived in Oxford House for over 5 years and without it i don't think i would be alive today.

Being stuck in my addiction for 35 years. Countless attempts at rehab and finding sobriety I tried and failed. That was until I found my recovery and accountability not because of rehab but because of Oxford houses. Because of oxford i have a life today. I'm a productive member of society spending my golden years working on the trauma that kept me in my active use. Working on my character defects everyday and rebuilding the relationships with the people i love most my daughter and grand daughter. who have a present father/ grandfather today. none of this and i mean NONE would be possible without what oxford has offered me and so many other countless addicts. I'm very opposed to bill HB 2239 and the certification process and standards of Oxford house Inc should be held as equal to the NARR certification process.

sincerely recovering addict
