I am opposed to bill HB 2239 as it does not recognize Oxford House Incorporated's certification process and standards as equal to those of NARR certification.

Oxford House Inc is a vital component of Oregon addiction recovery. My sister moved into Oxford House Morrison after struggling with addiction for 20 years. This was a turning point in her recovery. Oxford House is more than sober living homes; it is a community that helps its members develop the skills and connections to maintain sobriety. My sister would not be who she is today without Oxford House.
